Règles de santé et de sécurité pour le travail sur équipement suspendu 90 \$

Cette norme énonce des exigences relatives à la manœuvre en toute sécurité de divers types d'équipement suspendu utilisés pour accéder aux murs intérieurs ou extérieurs, ou aux deux, des bâtiments ou des structures. Une bonne partie de l'équipement auquel cette norme fait référence est conçu, installé, inspecté et mis à l'essai conformément à la norme CAN/CSA-Z271.

Le but de cette norme est de présenter les exigences de base relatives à la santé et à la sécurité au travail à l'intention des personnes qui se trouvent ou travaillent sur des équipements suspendus de façon permanente ou temporaire à des bâtiments ou des structures. Ces équipements comprennent, entre autres, les plates-formes suspendues, les sellettes, les plates-formes coulissant sur plans inclinés et les cages de travail suspendues. Ils ne comprennent pas les harnais de suspension, l'équipement suspendu à des grues ou des treuils, les appareils de levage et les plates-formes qui prennent appui au sol ou sur le bâtiment.
