## Canadian Standards Association

### *Making Standards Work for People and Business*

The **Canadian Standards Association** has been a leader in standards development since 1919. Accredited by the Standards Council of Canada, we have published over 2000 standards for the safety, design and performance of a wide range of products and services. Many of our standards are cited in legislation at federal, provincial, state and municipal levels across North America. Many are internationally or regionally harmonized. All of our standards are the result of the knowledge and expertise of our members who develop the standards.

Our 9,000+ members are at the heart of the CSA process for the development of standards. They come from all walks of life and include scientists, academics, environmentalists and technicians. They represent government, industry, labour and consumers. All CSA standards are developed following principles of consensus, so that all viewpoints receive a fair hearing with no one interest group dominating.

There are two different types of membership; volunteer committee membership and sustaining membership. Our committee members contribute time and expertise to the process of standards development, and our sustaining members support this work through the payment of annual dues.

CSA is funded through the sale of information products, membership, and from interested stakeholders.

At the Canadian Standards Association, we know the power of standards to effect change and are committed to making standards work for people and business.

For more than 80 years, the Canadian Standards Association has developed standards to create a better, safer world – and we will continue to touch people's lives in positive ways for many years to come.

*Visit our web site at [www.csa.ca](http://www.csa.ca) and  
find out just how convenient  
and efficient it is to access  
all the latest information.*

# Using Info Update

---

## About this publication

---

*Info Update* is published by the Canadian Standards Association (CSA) eight times a year. It contains important information about new and existing standards, and standards under development. It also gives you highlights of other activities and services.

CSA offers a free online service called *Keep Me Informed* that will notify registered users when each new issue of *Info Update* is published. To register go to <http://www.csa-intl.org/onlinestore/KeepMeInformed/KeepMeInformed.asp>.

Information is organized into the eight program areas listed below.

**Communications/Information** includes Information Technology • Telecommunications

**Construction Products & Materials** includes Building Products • Building Systems (Industrialized Buildings) • Concrete • Forest Products • Masonry • National Construction Codes • Offshore Structures • Plumbing Products and Materials • Structures (Design) • Welding and Structural Metals

**Electrical/Electronics** includes the Canadian Electrical Code, Part I • Canadian Electrical Code, Part II – General Requirements • Canadian Electrical Code, Part II – Consumer and Commercial Products, Industrial Products, and Wiring Products • Canadian Electrical Code Part III – Outside Wiring • Electrical Engineering Standards • Electromagnetic Compatibility

**Energy** includes Fire Safety and Fuel Burning Equipment • Nuclear • Oil and Gas Industry Systems and Materials • Performance, Energy Efficiency and Renewables

**Environment** includes Environmental Management • Environmental Technology

**Gas Equipment** includes Natural Gas and Propane Installation Codes • Natural Gas and Propane Vehicle Fuel Systems and Industrial Engines • Accessories • Domestic and Commercial Water Heaters and Boilers • Food Processing and Food Refrigeration • Gas Fired Domestic and Commercial Heating Equipment and Air Conditioning • Incineration • Large Input Commercial and Industrial Equipment (Over 400,000 Btu/H) • Laundry Equipment • Performance Test Methods • Portable-Type Camping Equipment • Gas Technician Training Materials

**Life Sciences** includes Community Safety and Well-being • Health Care Technology • Mechanical Industrial Equipment • Occupational Health & Safety

**Quality/Business Management** includes Basic Engineering • Public Involvement • Quality Assurance • Quality Auditing • Quality Management • Reliability • Risk Management

---

## What you'll find

---

Within each program, information is organized into the following sections:

### **Completed Projects / Projets terminés**

#### ▼ **New Standards — New Editions — Special Publications**

This section lists new standards, new editions (including adoptions), and special publications that have been published since the last issue of *Info Update*. To place your order call 1-800-463-6727 or visit our Online Store at [www.csa.ca](http://www.csa.ca). Prices shown are quoted in Canadian dollars and do not include applicable taxes or shipping charges. Our office locations are listed at the end of this document.

#### ▼ **Nouvelles normes — Nouvelles éditions — Publications spéciales publiées en français**

Cette section énumère les nouvelles normes et éditions (y compris les normes adoptées) ainsi que les publications spéciales qui ont paru depuis la dernière livraison du bulletin *Info-Update*. Pour commander, composez le 1 800 463-6727 ou visitez notre Boutique en ligne, au [www.csa.ca](http://www.csa.ca). Les prix sont indiqués en dollars canadiens et ne comprennent pas les taxes pertinentes ni les frais d'expédition. La liste de nos bureaux est présentée à la fin de ce document.

#### ▼ **Amendments**

Amendments are issued periodically for some standards. This section lists amendments that have been published since the last issue of *Info Update*. Most amendments are made available to the purchaser free of charge by returning the update notification card included in the standard or registering online for the update service through the Online Store at [www.csa.ca](http://www.csa.ca) and clicking on "My Account" on the navigation bar. Amendments developed by other standards development organizations, and adopted by CSA are made available for a fee. The prices shown are quoted in Canadian dollars and do not include applicable taxes or shipping charges.

#### ▼ **Modifications publiées en français**

Dans le cas de certaines normes, des modifications sont publiées à intervalles réguliers. Cette section présente la liste des modifications publiées depuis la dernière livraison du bulletin *Info-Update*. La plupart des modifications étant offertes gratuitement, vous n'avez qu'à remplir et à nous retourner la carte d'avis de mise à jour incluse avec chaque norme. Vous pouvez également vous inscrire en direct à notre service de mise à jour en vous rendant à la Boutique en ligne, au [www.csa.ca](http://www.csa.ca), et en cliquant sur le bouton « Mon compte » de la barre de navigation. Des frais s'appliquent toutefois aux modifications élaborées par d'autres organismes de normalisation et adoptées par la CSA. Les prix sont indiqués en dollars canadiens et ne comprennent pas les taxes pertinentes ni les frais d'expédition.

#### ▼ **Adopted Standards**

Adopted standards have been developed by another standards development organization and have been approved by our technical committee for use in Canada, with or without modification. They are available for sale from CSA. You will find published adopted standards listed under "New Standards — New Editions — Special Publications."

#### ▼ **Endorsed Standards**

Endorsed standards have been developed by another standards development organization, and have been approved by the appropriate CSA technical committee for use in Canada.

Endorsed standards are not sold by CSA.

For copies, contact the originating organization or Global Info Centre Canada at 1-800-854-7179 or 613-237-4250; fax 613-237-4251; e-mail [gic@ihscanada.ca](mailto:gic@ihscanada.ca); Web site <http://global.ihs.com>.

## **Completed Projects (cont'd) / Projets terminés (suite)**

### **▼ Reaffirmed Standards**

The standards listed in this section have been reviewed to determine if they remain technically valid and are acceptable for use until the next edition is published or for a further five years.

### **▼ Withdrawn Standards**

The standards listed in this section have been withdrawn. Most withdrawn standards are available from our archived collection. Some copies may not be in original format.

To order, call toll-free 1-800-463-6727 (in Toronto, 416-747-4044).

### **▼ Formal Interpretations**

This section lists questions that individuals have submitted about a particular standard. Each question has been reviewed and answered by the appropriate committee. If you would like to submit a question about a particular standard, please see the end notes in the preface of that standard.

## **Under Development**

### **▼ Notice of Intent**

CSA intends to begin work on the projects listed in this section. These projects include the development of new standards and editions (including adoptions), and endorsements. If you have relevant expertise and would like to contribute time, comments, or are able to support the development financially, please contact the person listed for that item.

### **▼ Drafts for Public Review**

Drafts of new standards, new editions, and amendments (including adoptions), and endorsements are available for public review before the technical committee approves the technical content. You have 60 days from the date of this issue of *Info Update* to comment on any item listed in this section.

Please return your comments as quickly as possible, so that we can pass them on to the appropriate committee for review. To request copies or offer comments, contact the person noted for that draft. If you would like to comment on a standard that is being proposed for endorsement or adoption, you can obtain a copy from the originating organization for a fee.

After the expiry date for public comments, you can buy the public review drafts, up until the approval stage, for \$50 (plus shipping and handling). *Please note:* Drafts are works in progress and have no official status. They are not a substitute for the final, approved standards and amendments. Do not use them as an authoritative source.

### **▼ Proposed Reaffirmation of Standards**

Standards listed in this section are being reviewed to determine if they remain technically valid and current. If you have any comments, send them to the contact person noted within 30 days of the date of this issue of *Info Update*. Your comments will be passed on to the appropriate committee for consideration.

### **▼ Proposed Withdrawal of Standards**

These documents are being considered for withdrawal. If you have any questions or concerns about this, contact the person noted within 30 days of the date of this issue of *Info Update*.

### **▼ Status of Standards Projects**

The project status report was formerly published quarterly in *Info Update*. Beginning with the February 2003 issue of *Info Update* this information will be available on our web site, independent of *Info Update*. To view or download visit <http://www.csa.ca/standards/default.asp?load=report&language=English>. This report lists projects that CSA committees are currently working on. Standards listed in this report are not yet available for sale.

## ***Certification and Testing (CSA International)***

### **▼ Informs Notices (Bulletins from CSA International)**

An *Informs* is a notice containing information only. It does not contain anything that would require you to resubmit products for certification. If you would like a copy of an *Informs* notice, call CSA International at 416-747-4171, or fax 416-747-2476.

### **▼ Certification Notices**

Certification notices inform you about changes that would require a product to be resubmitted for certification or about critical factors that may affect a product's certification. Products must comply with the changed requirements by the effective dates given.

CSA certification and testing clients receive these notices automatically. If you did not receive a copy or would like to receive one, call CSA International at 416-747-4171, or fax 416-747-2476.

## New Standards in this Issue

### Construction Products and Materials

#### [A123.4-04, 3rd edition](#)

*Asphalt for Constructing Built-Up Roof Coverings and Waterproofing Systems*

#### [A165 Series-04, 4th edition](#)

*CSA Standards on Concrete Masonry Units*

#### [A179-04, 3rd edition](#)

*Mortar and Grout for Unit Masonry*

#### [A370-04, 3rd edition](#)

*Connectors for Masonry*

#### [A371-04, 4th edition](#)

*Masonry Construction for Buildings*

#### [A660-04, 2nd edition](#)

*Certification of Manufacturers of Steel Building Systems*

#### [G40.20-04/G40.21-04, 6th edition](#)

*General Requirements for Rolled or Welded Structural Quality Steel / Structural Quality Steel*

#### [S471-04, 3rd edition](#)

*General Requirements, Design Criteria, the Environment, and Loads*

#### [S473-04, 3rd edition](#)

*Steel Structures*

### Produits et matériaux de construction

#### [W59-03, 8<sup>e</sup> édition](#)

*Construction soudée en acier (soudage à l'arc)*

### Electrical / Electronics

#### [C22.2 No. 31-04, 8th edition](#)

*Switchgear Assemblies*

*Mine Power Feeder Cables*

#### [C22.2 No. 124-04, 5th edition](#)

*Mineral-Insulated Cable*

#### [C22.2 No. 178.2-04, 1st edition](#)

*Requirements for Manually Operated Generator Transfer Panels*

## **Electrical / Electronics (cont'd)**

### C22.2 No. 235-04, 2nd edition

*Supplementary Protectors*

### CAN/CSA-C22.2 No. 262-04, 1st edition

*Optical Fiber Cable and Communication Cable Raceway Systems*

### CAN/CSA-C22.2 No. 60745-1-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 1: General Requirements*

(Bi-national standard with UL 60745-1, third edition. Adopted IEC 60745-1:2003, edition 3.2, with modifications)

### CAN/CSA-C22.2 No. 60745-2-1-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-1: Particular Requirements for Drills and Impact Drills* (Bi-national standard with UL 60745-2-1, second edition. Adopted IEC 60745-2-1:2003, second edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-2-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-2: Particular Requirements for Screwdrivers and Impact Wrenches* (Bi-national standard with UL 60745-2-2, second edition. Adopted IEC 60745-2-2:2003, second edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-4-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-4: Particular Requirements for Sanders and Polishers Other Than Disk Type* (Bi-national standard with UL 60745-2-4, second edition. Adopted IEC 60745-2-4:2002, second edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-5-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-5: Particular Requirements for Circular Saws* (Bi-national standard with UL 60745-2-5, third edition. Adopted IEC 60745-2-5:2003, third edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-6-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-6: Particular Requirements for Hammers* (Bi-national standard with UL 60745-2-6, second edition. Adopted IEC 60745-2-6:2003, second edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-8-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-8: Particular Requirements for Shears and Nibblers* (Bi-national standard with UL 60745-2-8, second edition. Adopted IEC 60745-2-8:2003, second edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-9-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-9: Particular Requirements for Tappers* (Bi-national standard with UL 60745-2-9, second edition. Adopted IEC 60745-2-9:2003, second edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-11-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-11: Particular Requirements for Reciprocating Saws* (Bi-national standard with UL 60745-2-11, second edition. Adopted IEC 60745-2-11:2003, second edition, with modifications)

## Electrical / Electronics (cont'd)

### CAN/CSA-C22.2 No. 60745-2-14-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-14: Particular Requirements for Planers* (Bi-national standard with UL 60745-2-14, second edition. Adopted IEC 60745-2-14:2003, second edition, with modifications)

### CAN/CSA-C22.2 No. 60745-2-17-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-17: Particular Requirements for Routers and Trimmers* (Bi-national standard with UL 60745-2-17, second edition. Adopted IEC 60745-2-17:2003, second edition, with modifications)

### CAN/CSA-CEI/IEC 61000-2-4:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)—Part 2-4: Environment—Compatibility Levels in Industrial Plants for Low-Frequency Conducted Disturbances*  
(Adopted CEI/IEC 61000-2-4:2002, second edition, without modification)

### CAN/CSA-CEI/IEC 61000-2-6:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)—Part 2: Environment—Section 6: Assessment of the Emission Levels in the Power Supply of Industrial Plants as Regards Low-Frequency Conducted Disturbances* (Adopted CEI/IEC 1000-2-6:1995, first edition, without modification)

### CAN/CSA-C61000-3-6:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)—Part 3: Limits—Section 6: Assessment of Emission Limits for Distorting Loads in MV and HV Power Systems—Basic EMC Publication*  
(Adopted CEI/IEC 1000-3-6:1996, first edition, with Canadian deviations)

### CAN/CSA-C61000-3-7:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)—Part 3: Limits—Section 7: Assessment of Emission Limits for Fluctuating Loads in MV and HV Power Systems—Basic EMC Publication*  
(Adopted CEI/IEC 1000-3-7:1996, first edition, with Canadian deviations)

## Électricité et électronique

### C22.2 n° 126.1-02, 2<sup>e</sup> édition

*Systèmes de chemins de câbles métalliques* (norme binationale avec NEMA VE 1-2002, quatrième édition)

### C22.2 n° 126.2-02, 1<sup>re</sup> édition

*Systèmes de chemins de câbles non métalliques* (norme binationale avec UL 568, première édition)

### CAN/CSA-C22.2 n° 262-04, 1<sup>re</sup> édition

*Canalisations pour câbles à fibres optiques et câbles de télécommunications*

### CAN/CSA-C22.2 n° 60745-2-8-04, 2<sup>e</sup> édition

*Outils électroportatifs à moteur—Sécurité—Partie 2-8 : Règles particulières pour les cisailles à métaux et les grignoteuses* (Norme binationale avec UL 60745-2-8, deuxième édition. Norme CEI 60745-2-8:2003, deuxième édition, adoptée avec exigences propres au Canada)

---

## Électricité et électronique (suite)

### CAN/CSA-C22.2 n° 60745-2-9-04, 2<sup>e</sup> édition

*Outils électroportatifs à moteur–Sécurité–Partie 2-9 : Règles particulières pour les taraudeuses* (Norme binationale avec UL 60745-2-9, deuxième édition.

Norme CEI 60745-2-9:2003, deuxième édition, adoptée avec exigences propres au Canada)

### CAN/CSA-C22.2 n° 60745-2-14-04, 2<sup>e</sup> édition

*Outils électroportatifs à moteur–Sécurité–Partie 2-14 : Règles particulières pour les rabots* (Norme binationale avec UL 60745-2-14, deuxième édition.

Norme CEI 60745-2-14:2003, deuxième édition, adoptée avec exigences propres au Canada)

### CAN/CSA-C22.2 n° 60745-2-17-04, 2<sup>e</sup> édition

*Outils électroportatifs à moteur–Sécurité–Partie 2-17 : Règles particulières pour les défonçeuses et affleureuses* (Norme binationale avec UL 60745-2-17, deuxième édition.

Norme CEI 60745-2-17:2003, deuxième édition, adoptée avec exigences propres au Canada)

### CAN/CSA-CEI/IEC 61000-2-4:04, 1<sup>r</sup>e édition (bilingue)

*Compatibilité électromagnétique (CEM)–Partie 2-4 : Environnement–*

*Niveaux de compatibilité dans les installations industrielles pour les perturbations conduites à basse fréquence* (norme CEI/IEC 61000-2-4:2002, première édition, adoptée sans modifications)

### CAN/CSA-CEI/IEC 61000-2-6:04, 1<sup>r</sup>e édition (bilingue)

*Compatibilité électromagnétique (CEM)–Partie 2 : Environnement–Section 6 : Évaluation des niveaux d'émission dans l'alimentation des centrales industrielles tenant compte des perturbations conduites à basse fréquence* (norme CEI/IEC 61000-2-4:2002, première édition, adoptée sans modifications)

### CAN/CSA-C61000-3-6:04, 1<sup>r</sup>e édition (bilingue)

*Compatibilité électromagnétique (CEM)–Partie 3 : Limites–Section 6 : Évaluation des limites d'émission pour les charges déformantes raccordées aux réseaux MT et HT–Publication fondamentale en CEM* (norme CEI/IEC 1000-3-6:1996, première édition, adoptée avec les exigences propres au Canada)

### CAN/CSA-C61000-3-7:04, 1<sup>r</sup>e édition (bilingue)

*Compatibilité électromagnétique (CEM)–Partie 3 : Limites–Section 7 : Évaluation des limites d'émission des charges fluctuantes sur les réseaux MT et HT–Publication fondamentale en CEM* (norme CEI/IEC 1000-3-7:1996, première édition, adoptée avec les exigences propres au Canada)

*Sélection et utilisation des citernes routières, des citernes routières à éléments multiples et des citernes amovibles pour le transport des marchandises dangereuses de la classe 2*

### CAN/CSA-Z262.7-04, 1<sup>re</sup> édition

*Lignes directrices visant la sécurité des spectateurs dans les stades intérieurs*

### Z314.10-03, 3<sup>e</sup> édition

*Sélection, utilisation, entretien et lavage des enveloppes, des blouses de chirurgien et des champs textiles réutilisables utilisés dans les établissements de santé*

### Z795-03, 2<sup>e</sup> édition

*Codage des données sur les accidents de travail et les maladies professionnelles*

### CAN/CSA-Z15882-04, 1<sup>re</sup> édition

*Stérilisation des produits de santé—Indicateurs chimiques—Guide pour la sélection, l'utilisation et l'interprétation des résultats (norme ISO 15882-2003, première édition, adoptée sans modification)*

## Completed Projects / Projets terminés

### Withdrawn Standards

CSA has withdrawn its endorsement of the following ISO standards:

- **ISO TR7477-1985**  
*Data Communication—Arrangements for DTE to DTF Physical Connection Using V24 Interchange Circuits*
- **ISO 7812:1987**  
*Identification Cards—Numbering System and Registration Procedure for Issuer Identifiers*
- **ISO 8802-4:1990**  
*Information Processing Systems—Local Area Networks—Part 4: Token-Passing Bus Access Method and Physical Layer Specifications*
- **ISO 9067:1987**  
*Information Processing Systems—Data Communication—Automatic Fault Isolation Procedures Using Test Loops*

## Under Development

### Proposed Withdrawal of Standards

For more information about the proposed withdrawal of the following standards, contact Tom Bartoffy at 416-747-2636 or [tom.bartoffy@csa.ca](mailto:tom.bartoffy@csa.ca):

- **CAN/CSA-ISO/IEC-3309-95 (R1999)**  
*Information Technology—Telecommunications and Information Exchange Between Systems—High-Level Data Link Control (HDLC) Procedures—Frame Structure*
- **CAN/CSA-ISO/IEC-4335-95 (R2000)**  
*Information Technology—Telecommunications and Information Exchange Between Systems—High-Level Data Link Control (HDLC) Procedures—Elements of Procedures*
- **CAN/CSA-ISO/IEC 4335F-95**  
*Amendment 6:2000, “Extension of HDLC Sequence Number Modulus Beyond 128,” to CAN/CSA-ISO/IEC 4335-95, “Information Technology—Telecommunications and Information Exchange Between Systems—High-Level Data Link Control (HDLC) Procedures—Elements Of Procedures”*

## Proposed Withdrawal of Standards (cont'd)

- **CAN/CSA-ISO/IEC 4335G-95**  
*Amendment 7:2000, "Enhanced Multi-Selective Reject Option," to CAN/CSA-ISO/IEC 4335-95, "Information Technology—Telecommunications and Information Exchange Between Systems—High Level Data Link Control (HDLC) Procedures—Elements of Procedures"*
- **CAN/CSA-ISO/IEC-7809-95 (R1999)**  
*Information Technology—Telecommunications and Information Exchange Between Systems—High-Level Data Link Control (HDLC) Procedures—Classes of Procedures*
- **CAN/CSA-ISO/IEC-7809-97 (R2001)**  
*Amendment 10:1997, "Extension of HDLC Sequence Number Modulus Beyond 128," to CAN/CSA-ISO/IEC-7809-95, "Information Technology—Telecommunications and Information Exchange Between Systems—High-Level Data Link Control (HDLC) Procedures—Classes of Procedures"*
- **CAN/CSA-ISO/IEC-7811-3-96 (R2000)**  
*Identification Cards—Recording Technique—Part 3: Location of Embossed Characters on ID-1 Cards*
- **CAN/CSA-ISO/IEC-8072-95 (R1999)**  
*Information Technology—Open Systems Interconnection—Transport Service Definition*
- **CAN/CSA-ISO/IEC 8632-2-01**  
*Information Technology—Computer Graphics—Metafile for the Storage and Transfer of Picture Description Information—Part 2: Character Encoding*
- **CAN/CSA-ISO/IEC 8632-2A-01**

## **Completed Projects / Projets terminés**

---

### New Standards – New Editions – Special Publications

---

#### **A123.4-04, 3rd edition**

*Asphalt for Constructing Built-Up Roof Coverings and Waterproofing Systems* ..... \$65

This standard applies to asphalt intended for use as hot cement and topcoat in the construction of built-up coverings on roof decks of various types and slopes, and in the construction of waterproofing systems.

#### **A165 Series-04, 4th edition**

*CSA Standards on Concrete Masonry Units* ..... \$70

The A165 series includes the following standards:

- **A165.1-04, Concrete Block Masonry Units.** This standard applies to concrete block masonry units made from cementitious materials, water, and aggregates, with or without other materials. This standard may be applied to other units of similar manufacture and size within the limitations of the standard.
- **A165.2-04, Concrete Brick Masonry Units.** This standard applies to hollow and solid concrete brick masonry units and similar units manufactured from a mixture of cementitious materials, water, and aggregates, with or without other materials.
- **A165.3-04, Prefaced Concrete Masonry Units.** This standard applies to concrete masonry units, both block and brick, having integral facings on one or two sides in gloss, semi-gloss, or matte finish.

#### **A179-04, 3rd edition**

*Mortar and Grout for Unit Masonry* ..... \$50

This standard specifies requirements for the following in unit masonry construction:

- mortar for use in bedding, jointing, and bonding of masonry units
- grout for use in filling core, cell, or cavity space.

This standard specifies requirements for two types of mortar (Type N and Type S), and two types of grout (fine and coarse).

## New Standards – New Editions – Special Publications (cont'd)

### A370-04, 3rd edition

*Connectors for Masonry*..... \$55

This standard specifies minimum requirements for designing the following masonry connectors:

- ties used to
  - interconnect the wythes of a masonry wall
  - attach masonry veneer to its structural backing
- anchors used to
  - connect masonry walls to intersecting walls or to other structural members
  - attach stone to its structural backing
  - interconnect stone
- fasteners used to secure masonry ties and anchors to structural elements
- repair connectors used to restore or improve masonry construction.

### A371-04, 4th edition

*Masonry Construction for Buildings*..... \$60

This standard specifies minimum requirements for masonry materials and masonry construction.

### A660-04, 2nd edition

*Certification of Manufacturers of Steel Building Systems* ..... \$45

This standard applies to the certification of manufacturers of steel building systems.

A steel building system is defined as an integrated assembly of manufactured steel structural components and cladding components specifically designed by the manufacturer to support and transfer loads and provide a complete or partial building shell.

This standard prescribes the procedure for certification based on an audit of a manufacturer's plant(s) and facilities by the certification agency.

This standard provides requirements for a certificate of design and manufacturing conformance for each steel building system supplied by a certified manufacturer.

### G40.20-04/G40.21-04, 6th edition

*General Requirements for Rolled or Welded Structural Quality Steel / Structural Quality Steel* ..... \$125

G40.20-04 outlines requirements that apply, unless otherwise specified in a purchase order or individual standard, to structural quality steel plates, shapes, sheet, sheet piling, cold-formed channels, hollow sections, Z sections, and bars conforming to the requirements of CSA G40.21.

G40.21-04 covers structural quality steel plates, shapes, hollow sections, sheet, sheet piling, cold-formed channels, Z sections, and bars for general construction and engineering purposes.

## New Standards – New Editions – Special Publications (cont'd)

### S471-04, 3rd edition

*General Requirements, Design Criteria, the Environment, and Loads* ..... \$150

This standard specifies minimum requirements for, and provides guidance on, design principles, safety levels, and loads in connection with the design, construction, transportation, installation, and decommissioning of offshore structures.

This standard is intended to cover all offshore structures and all parts of offshore structures (including the main deck and topside structures), whether they are of steel, reinforced concrete, composite, hybrid, or earth-filled construction.

### S473-04, 3rd edition

*Steel Structures* ..... \$150

This standard specifies minimum requirements for the design and fabrication of steel fixed offshore structures whose design is based on limit states.

This standard applies to standard steel fixed offshore structures. Supplementary rules or requirements may be necessary for unusual types of construction. The resistances of the non-tubular members of the structures comprising the topside facilities and main deck are covered in CAN/CSA-S16.

An alternative rational design method based on theory, analysis, and recognized engineering practice may be used in lieu of the design process and formulas provided in this standard, provided that the alternative method established levels of safety and performance that are at least equal to those established by this standard and CSA S471.

## Nouvelles normes – Nouvelles éditions – Publications spéciales publiées en français

### W59-03, 8<sup>e</sup> édition

*Construction soudée en acier (soudage à l'arc)* ..... 250 \$

Cette norme traite des exigences de soudage pour tous les types de construction soudée en acier au carbone et faiblement allié.

Cette norme ne vise pas les appareils sous pression ni les structures régis par des codes spéciaux tels ceux de Lloyds, de l'American Petroleum Institute, de l'American Society of Mechanical Engineers ou de l'American Water Works Association. Cette norme ne vise pas le soudage de l'acier inoxydable.

Cette norme contient des dispositions relatives aux procédés de soudage à l'arc avec électrode enrobée (SMAW), à l'arc submergé (SAW), à l'arc sous gaz avec fil plein (GMAW), à l'arc avec fil fourré (FCAW), à l'arc avec électrode fourrée d'éléments métalliques (MCAW), au soudage vertical sous laitier (ESW), au soudage électrogaz (EGW) ainsi qu'au soudage des goujons (SW).

---

## Amendments

---

### CAN/CSA-S136-01

*North American Specification for the Design of Cold-Formed Steel Structural Members*

Revision of the outside and inside front cover, and the title page.

### CAN/CSA-W117.2-01

*Safety in Welding, Cutting, and Allied Processes*

Revision of the Contents page, and Clauses 8.9.3.9, 8.9.4.12, 10.10.6.4, and 10.10.6.5.

Addition of Clause 8.11 and Appendix G.

---

## Modifications publiées en français

---

### CAN/CSA-S136-01

*Spécification nord-américaine pour le calcul des éléments de charpente en acier formés à froid*

Des modifications ont été apportées à la première de couverture, à la deuxième de couverture ainsi qu'à la page titre.

### CAN/CSA-W117.2-01

*Règles de sécurité en soudage, coupure et procédés connexes*

Des modifications ont été apportées à la table des matières, aux articles 8.9.3.9, 8.9.4.12, 10.10.6.4 et 10.10.6.5. L'article 8.1 et l'appendice B ont été ajoutés.

---

## Reaffirmed Standards

---

### CAN/CSA-B602-99 (R2004)

*Mechanical Couplings for Drain, Waste, and Vent Pipe and Sewer Pipe*

### CAN/CSA-O15-90 (R2004)

*Wood Utility Poles and Reinforcing Stubs*

### CAN/CSA-O141-91 (R2004)

*Softwood Lumber*

---

## Withdrawn Standards

---

### CAN3-A31-M75 (R1999)

*Series of Standards for Metric Dimensional Coordination in Building*

(Consists of CAN3-A31.1M, CAN3-A31.2M, CAN3-A31.3M, CAN3-A31.4M, and CAN3-A31.5M.)

### PLUS 4002-95

*ASTM Specifications for Cold Formed Steel Structural Members: ASTM Standards Referenced in CSA's S136-94*

## ***Under Development***

---

### **Notice of Intent**

---

For more information about the proposed development of the following new project, contact Derrick Mckenzie at 416-747-2746 or derrick.mckenzie@csa.ca:

### **Completed Projects / Projets terminés**

---

#### New Standards – New Editions – Special Publications

---

##### **C22.2 No. 31-04, 8th edition**

*Switchgear Assemblies* ..... \$65

This standard applies to indoor open and enclosed and outdoor enclosed assemblies of switchgear devices such as the following:

- switches
- interrupting devices
- air circuit breakers
- power circuit breakers
- control, metering, protective, and regulating equipment with associated interconnections and supporting structures.

This standard covers equipment with nominal voltage of 46 kV and less that is intended to be used as follows:

- in accordance with the rules of the *Canadian Electrical Code, Part I*
- in non-hazardous locations
- for controlling and protecting the power from generators or other sources
- for supplying electrical energy to power and lighting circuits.

##### **C22.2 No. 96.1-04, 1st edition**

*Mine Power Feeder Cables* ..... \$100

This standard specifies construction and testing of mine power feeder cables normally used for power distribution in stationary or semi-stationary applications that are covered by CAN/CSA-M421 and the *Canadian Electrical Code, Part I*.

This standard covers cables with voltage levels of 5, 8, 15, and 25 kV rated at 100% and 133% insulation levels.

##### **C22.2 No. 124-04, 5th edition**

*Mineral-Insulated Cable* ..... \$100

This standard applies to mineral-insulated cables with copper, nickel-/nickel-alloy-clad copper, steel-clad copper, or nickel conductors, enclosed in a copper or stainless steel sheath.

The constructions covered by this standard are intended for use in power, instrumentation, control, and fire alarm systems in accordance with the *Canadian Electrical Code, Part I*.

## New Standards – New Editions – Special Publications (cont'd)

### C22.2 No. 178.2-04, 1st edition

*Requirements for Manually Operated Generator Transfer Panels* ..... \$60

This standard covers manual transfer panels having maximum ratings of 250 V, 60 A, for use in non-hazardous locations in accordance with the *Canadian Electrical Code, Part I*.

This standard covers manual transfer panels that are intended for use on the load side of a distribution on a single-phase, 2-wire or 3-wire system, to provide manual switching to power supply from a generator when the normal power fails or in other similar situations.

### C22.2 No. 235-04, 2nd edition

*Supplementary Protectors* ..... \$245

This standard applies to supplementary protectors of the manual-reset type that may or may not have a manual means of operation and that are intended for use as components within appliances or other electrical equipment where branch-circuit overcurrent protection is already provided (or is not required), in accordance with the Rules of the *Canadian Electrical Code, Part I*. The acceptability of the component is to be determined in its final application.

This standard applies to the following:

- overcurrent-trip protectors
- overvoltage-trip protectors
- undervoltage-trip protectors
- relay-trip protectors
- accessory devices such as alarm and auxiliary switches that are installed in or on the protector to perform an auxiliary function.

This standard applies to single-pole and multi-pole protectors for controlling single or polyphase a.c. or d.c. loads rated 600 V or less.

### CAN/CSA-C22.2 No. 262-04, 1st edition

*Optical Fiber Cable and Communication Cable Raceway Systems* ..... \$100

This standard applies to optical fiber cable and communication cable raceway systems designed for use with optical fiber and communication cables and intended to be installed in accordance with the *Canadian Electrical Code, Part I*.

### CAN/CSA-C22.2 No. 60745-1-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 1: General Requirements*

(Bi-national standard with UL 60745-1, third edition. Adopted IEC 60745-1:2003, edition 3.2, with modifications) ..... \$140

This Part 1 standard deals with the safety of hand-held motor-operated or magnetically driven electric tools with a rated voltage of not more than 250 V for single-phase a.c. or d.c., and 440 V for three-phase a.c. tools.

This standard deals with tools used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

## New Standards – New Editions – Special Publications (cont'd)

### CAN/CSA-C22.2 No. 60745-2-1-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-1: Particular Requirements for Drills and Impact Drills* (Bi-national standard with UL 60745-2-1, second edition. Adopted IEC 60745-2-1:2003, second edition, with modifications) .....\$320

This Part 2 standard applies to drills and impact drills used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-C22.2 No. 60745-2-2-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-2: Particular Requirements for Screwdrivers and Impact Wrenches* (Bi-national standard with UL 60745-2-2, second edition. Adopted IEC 60745-2-2:2003, second edition, with modifications) .....\$320

This Part 2 standard applies to screwdrivers and impact wrenches used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-C22.2 No. 60745-2-4-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-4: Particular Requirements for Sanders and Polishers Other Than Disk Type* (Bi-national standard with UL 60745-2-4, second edition. Adopted IEC 60745-2-4:2002, second edition, with modifications) .....\$320

This Part 2 standard applies to non-disk type sanders and polishers. Tools covered by this standard include, but are not limited to, belt sanders, reciprocating sanders or polishers, orbital sanders or polishers, and random orbit sanders or polishers.

This standard deals with tools used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-C22.2 No. 60745-2-5-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-5: Particular Requirements for Circular Saws* (Bi-national standard with UL 60745-2-5, third edition. Adopted IEC 60745-2-5:2003, third edition, with modifications) .....\$320

This Part 2 standard applies to circular saws. This standard does not apply to saws used with abrasive wheels.

This standard deals with tools used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

## New Standards – New Editions – Special Publications (cont'd)

### CAN/CSA-C22.2 No. 60745-2-6-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-6: Particular Requirements for Hammers* (Bi-national standard with UL 60745-2-6, second edition. Adopted IEC 60745-2-6:2003, second edition, with modifications) ..... \$320

This Part 2 standard applies to hammers, including, but not limited to, percussion and rotary hammers.

This standard deals with tools used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-C22.2 No. 60745-2-8-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-8: Particular Requirements for Shears and Nibblers* (Bi-national standard with UL 60745-2-8, second edition. Adopted IEC 60745-2-8:2003, second edition, with modifications) ..... \$320

This Part 2 standard applies to shears and nibblers used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-C22.2 No. 60745-2-9-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-9: Particular Requirements for Tappers* (Bi-national standard with UL 60745-2-9, second edition. Adopted IEC 60745-2-9:2003, second edition, with modifications) ..... \$320

This Part 2 standard applies to tappers used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-C22.2 No. 60745-2-11-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-11: Particular Requirements for Reciprocating Saws* (Bi-national standard with UL 60745-2-11, second edition. Adopted IEC 60745-2-11:2003, second edition, with modifications) ..... \$320

This Part 2 standard applies to reciprocating saws, including, but not limited to, jigsaws and reciprocating saws (sabre saws).

This standard deals with tools used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-C22.2 No. 60745-2-14-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-14: Particular Requirements for Planers* (Bi-national standard with UL 60745-2-14, second edition. Adopted IEC 60745-2-14:2003, second edition, with modifications) ..... \$320

This Part 2 standard applies to planers used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

## New Standards – New Editions – Special Publications (cont'd)

### CAN/CSA-C22.2 No. 60745-2-17-04, 2nd edition

*Hand-Held Motor-Operated Electric Tools—Safety—Part 2-17: Particular Requirements for Routers and Trimmers* (Bi-national standard with UL 60745-2-17, second edition. Adopted IEC 60745-2-17:2003, second edition, with modifications) .....\$320

This Part 2 standard applies to routers and trimmers used in non-hazardous locations in accordance with the *National Electrical Code*, NFPA 70, and the *Canadian Electric Code, Part I*.

### CAN/CSA-CEI/IEC 61000-2-4:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)—Part 2-4: Environment—Compatibility Levels in Industrial Plants for Low-Frequency Conducted Disturbances* (Adopted CEI/IEC 61000-2-4:2002, second edition, without modification) .....\$140

This standard applies to conducted disturbances in the frequency range from 0 kHz to 9 kHz. It provides numerical compatibility levels for industrial and non-public power distribution systems at nominal voltages up to 35 kV and a nominal frequency of 50 Hz or 60 Hz.

### CAN/CSA-CEI/IEC 61000-2-6:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)—Part 2: Environment—Section 6: Assessment of the Emission Levels in the Power Supply of Industrial Plants as Regards Low-Frequency Conducted Disturbances* (Adopted CEI/IEC 1000-2-6:1995, first edition, without modification) .....\$185

This technical report recommends the procedures for assessing the disturbance levels produced by the emission of the devices, equipment and systems installed in non-public networks in industrial environments, as far as the low-frequency conducted disturbances in the power supply are concerned; on this basis the relevant emission limits can be derived. It applies to low and medium voltage a.c. non-public supply at 50/60 Hz. Networks for ships, aircraft, off-shore platforms and railways are not covered by this standard.

This report deals with the low-frequency conducted disturbances emitted by equipment connected to the power supply. The disturbances considered are the following:

- harmonics and interharmonics
- unbalances
- voltage changes
- voltage dips.

### CAN/CSA-C61000-3-6:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)–Part 3: Limits–Section 6: Assessment of Emission Limits for Distorting Loads in MV and HV Power Systems–Basic EMC Publication*  
(Adopted CEI/IEC 1000-3-6:1996, first edition, with Canadian deviations) ..... \$160

This technical report outlines principles that are intended to be used as the basis for determining the requirements for connecting large distorting loads (producing harmonics and/or interharmonics) to public power systems. The primary objective is to provide guidance for engineering practices that will ensure adequate service quality for all connected consumers.

### CAN/CSA-C61000-3-7:04, 1st edition (bilingual)

*Electromagnetic Compatibility (EMC)–Part 3: Limits–Section 7: Assessment of Emission Limits for Fluctuating Loads in MV and HV Power Systems–Basic EMC Publication*  
(Adopted CEI/IEC 1000-3-7:1996, first edition, with Canadian deviations) ..... \$140

This technical report outlines principles that are intended to be used as the basis for determining the requirements for connecting large fluctuating loads (producing flicker) to public power systems. The primary objective is to provide guidance for engineering practices that will ensure adequate service quality for all connected consumers.

La présente norme s'applique aux défonceuses et aux affleureuses.

Cette norme vise les outils utilisés dans des emplacements non dangereux conformément au *National Electrical Code*, NFPA 70 et au *Code canadien de l'électricité, Première partie*.

## Nouvelles normes – Nouvelles éditions – Publications spéciales (suite)

<b>CAN/CSA-CEI/IEC 61000-2-4:04, 1<sup>re</sup> édition (bilingue)</b> <i>Compatibilité électromagnétique (CEM)–Partie 2-4 : Environnement–Niveaux de compatibilité dans les installations industrielles pour les perturbations conduites à basse fréquence</i> (norme CEI/IEC 61000-2-4:2002, première édition, adoptée sans modifications) .....	140 \$
---	--------

Cette norme est relative aux perturbations conduites dans le domaine de fréquence de 0 kHz à 9 kHz. Elle fournit les valeurs numériques des niveaux de compatibilité pour les réseaux de distribution d'énergie industriels et non publics, à des tensions nominales allant jusqu'à 35 kV et à la fréquence nominale de 50 Hz ou 60 Hz.

<b>CAN/CSA-CEI/IEC 61000-2-6:04, 1<sup>re</sup> édition (bilingue)</b> <i>Compatibilité électromagnétique (CEM)–Partie 2 : Environnement–Section 6 : Évaluation des niveaux d'émission dans l'alimentation des centrales industrielles tenant compte des perturbations conduites à basse fréquence</i> (norme CEI/IEC 1000-2-6:1995, première édition, adoptée sans modifications) .....	185 \$
---	--------

Le présent rapport technique recommande les procédures destinées à évaluer les niveaux de perturbation produits par l'émission des appareils, des équipements et systèmes installés dans les réseaux non publics en environnement industriel en ce qui concerne les perturbations conduites à basse fréquence dans l'alimentation en énergie électrique ; sur cette base on pourra déduire les limites d'émission adéquates. Cette norme s'applique aux alimentations non publiques en courant alternatif de basse et moyenne tension à 50/60 Hz. Les réseaux de bateaux, d'avions, de plates-formes de forage et de chemins de fer ne sont pas du ressort de ce rapport technique.

Ce guide couvre les perturbations conduites à basse fréquence émises par un équipement connecté à une alimentation en énergie électrique. Les perturbation prises en compte sont :

- les harmoniques et interharmoniques
- les déséquilibres
- les changements de tension
- les creux de tension.

<b>CAN/CSA-C61000-3-6:04, 1<sup>re</sup> édition (bilingue)</b> <i>Compatibilité électromagnétique (CEM)–Partie 3 : Limites–Section 6 : Évaluation des limites d'émission pour les charges déformantes raccordées aux réseaux MT et HT–Publication fondamentale en CEM</i> (norme CEI/IEC 1000-3-6:1996, première édition, adoptée avec exigences propres au Canada) .....	160 \$
---	--------

Le présent rapport technique présente les principes servant de base à la détermination des exigences à respecter lors du raccordement des charges déformantes de grande puissance (produisant des harmoniques et/ou des interharmoniques) au réseau public. L'objectif principal est de fournir des indications sur les pratiques d'ingénierie qui assurent une qualité de service adéquate à tous les usagers d'un même réseau.

*Installation Code for Oil-Burning Equipment* ..... \$100

This code applies to the following:

- the installation of appliances, equipment, components, and accessories (where oil is used for fuel purposes) such as the following:
  - forced-air furnaces
  - boilers
  - domestic water heaters
  - vehicle heaters
  - emergency power supplies for buildings
- the installation of all stationary and portable oil-burning equipment, including fuel supply, piping, and non-integrated tanks for fuel-oil-driven internal combustion engines
- the installation of above-ground tanks that have a maximum individual capacity of 2500 L (550 gal) and a maximum aggregate capacity of 5000 L (1100 gal), and the piping and tubing systems from the tanks to the oil-fired appliance.

*Évaluation du rendement du matériel de ventilation mécanique pour habitations* ..... 50 \$

Cette norme s'applique au matériel de ventilation mécanique d'alimentation et d'extraction. Elle vise notamment les ventilateurs de salles de bains, les hottes de cuisinière ou le matériel de ventilation intégré à un système de ventilation central.

Cette norme a pour objet d'établir une méthode uniforme pour :

- a) établir les caractéristiques du mouvement de l'air ;
- b) mesurer le niveau sonore du matériel de ventilation mécanique pour habitations.

#### **CAN/CSA-C309-M90, 2<sup>e</sup> édition**

*Réservoirs à accumulation vitrifiés pour la production d'eau chaude pour usage domestique : exigences de fonctionnement* ..... 50 \$

Cette norme vise les réservoirs à accumulation vitrifiés pour la production d'eau chaude pour usage domestique. Elle énonce les exigences relatives au métal de base, à la construction, au revêtement vitrifié, à la protection cathodique, à l'inspection et à la mise à l'essai.

### C360-03, 5<sup>e</sup> édition

*Rendement énergétique, consommation d'eau et capacité des machines à laver électrodomestiques .....* 85 \$

Cette norme vise :

- a) les machines à laver électrodomestiques compactes et standard automatiques ou semi-automatiques, à axe horizontal et à axe vertical ; et
- b) les machines à laver à pièces de monnaie ou cartes.

### CAN/CSA-C373-92, 3<sup>e</sup> édition

*Consommation d'énergie des lave-vaisselle électroménagers : méthodes d'essai .....* 50 \$

Cette norme prescrit les méthodes de mesurage de la consommation d'énergie des lave-vaisselle électroménagers ainsi que les limites de consommation.

Cette norme vise les lave-vaisselle électroménagers automatiques destinés à une alimentation c.a. de 60 Hz et une tension nominale de réseau de 120 ou 240 V.

Cette norme ne vise pas les lave-vaisselle d'utilisation commerciale, industrielle ou utilisés dans les institutions.

Cette norme doit être considérée comme un instrument de mesure des performances énergétiques. Elle ne vise pas à empêcher la manifestation de l'ingéniosité dans la conception ou l'amélioration des lave-vaisselle électroménagers.

### C657-04, 2<sup>e</sup> édition

*Rendement énergétique des présentoirs réfrigérés .....* 55 \$

Cette norme s'applique aux présentoirs réfrigérés, destinés à présenter aux acheteurs des denrées alimentaires, y compris des boissons en cannette ou en bouteille, de la glace pour consommation humaine et autres denrées périssables (par exemple des fleurs coupées).

Cette norme présente des définitions, une classification et une méthode permettant d'établir la consommation quotidienne spécifique d'énergie et énonce des exigences minimales de rendement énergétique visant les présentoirs réfrigérés.

### C744-04, 2<sup>e</sup> édition

*Norme sur les conditionneurs d'air et les thermopompes monoblocs (binationale avec ARI 310/380-2004) .....* 55 \$

Cette norme vise les conditionneurs d'air et les thermopompes monoblocs d'usage d'habitation, commerciaux et industriels fabriqués en usine.

Cette norme s'adresse aux fabricants, ingénieurs, installateurs, entrepreneurs et utilisateurs.

## Nouvelles normes – Nouvelles éditions – Publications spéciales (suite)

### C745-03, 3<sup>e</sup> édition

*Rendement énergétique des chauffe-eau électriques à accumulation et des chauffe-eau à pompe à chaleur..... 55 \$*

Cette norme prescrit les méthodes servant à déterminer le coefficient énergétique des chauffe-eau électriques à accumulation et des chauffe-eau à pompe à chaleur.

Cette norme fixe les valeurs minimales de rendement énergétique des chauffe-eau électriques à accumulation et des chauffe-eau à pompe à chaleur.

Cette norme s'applique :

- a) aux chauffe-eau électriques à accumulation :
  - i) d'un volume de 76 à 454 L (20 à 120 gal US) ;
  - ii) dont les éléments chauffants électriques ont une puissance de chauffe absorbée d'au plus 12 kW ; et
  - iii) conçus pour chauffer et maintenir l'eau par commande thermostatique à une température égale ou inférieure à 82 °C (180°F) ; et
- b) aux chauffe-eau à pompe à chaleur :
  - i) d'un courant nominal maximal de 24 A ;
  - ii) d'une tension monophasée maximale de 250 V ; et
  - iii) équipés de l'appareillage auxiliaire nécessaire à leur fonctionnement.

### Z314.7-03, 4<sup>e</sup> édition

*Stérilisateurs à la vapeur pour les établissements de santé ..... 75 \$*

Cette norme s'applique :

- a) aux stérilisateurs à la vapeur qui :
  - i) ont une chambre d'un volume de 42,5 L (1,5 pi<sup>3</sup>) ou plus ; et
  - ii) sont destinés aux établissements de santé ;
- b) aux stérilisateurs d'urgence (stérilisateurs rapides) ; et
- c) aux laveurs-désinfecteurs (s'ils sont utilisés en mode stérilisateur).

Cette norme prescrit les exigences minimales visant la construction et la performance des stérilisateurs, afin de garantir que :

- a) les conditions requises pour la stérilisation sont respectées ; et
- b) le personnel qui utilise ces appareils peut effectuer ses tâches en toute sécurité.

## Formal Interpretations

The following interpretations regarding Clause 7.5.2 of CSA standard **N285.0-95, General Requirements for Pressure-Retaining Systems and Components in CANDU Nuclear Power Plants**, have been approved by the Technical Committee on CANDU Nuclear Power Plant Systems and Components.

**Question 1:** Is it mandatory to specifically state on a system flowsheet, in the form of a note or otherwise, that an open vent or bleed-off line is used as the basis for over pressure protection?

**Answer:** Yes.

**Question 2:** Is it mandatory to specifically state on a system flowsheet a pump's maximum shut off head, in form of a note or otherwise, if it serves as the basis for the design pressure of the system?

**Answer:** No.

## Under Development

*Environmental Management Systems for Hog Operations: Requirements..... \$60*

This standard specifies the requirements for an environmental management system (EMS) for hog operations. This standard can be applied to hog operations or to any other livestock operations containing hogs.

This standard is intended to be used by hog operations that wish to have their EMS registered by a nationally accredited third-party registration body.

---

##### **ANSI Z83.4-2003/CSA 3.7-2003, 2nd edition**

*Non-Recirculating Direct Gas-Fired Industrial Air Heaters* ..... \$505

This standard details test and examination criteria for direct gas-fired industrial air heaters of the non-recirculating type, for use with natural, manufactured and mixed gases, LP gases, and LP gas-air mixtures. A direct gas-fired industrial air heater of the non-recirculating type is described as a heater “whose purpose is to offset building heat loss. All air to the heater shall be ducted directly from outdoors and the products of combustion generated by the heater are released into the air stream being heated.”

##### **P.3-04, 3rd edition**

*Testing Method for Measuring Energy Consumption and Determining Efficiencies of Gas-Fired Storage Water Heaters* ..... \$150

This standard describes the test procedures to perform a 24-hour simulated use test. This standard also provides the calculations required to determine the first-hour rating, recovery efficiency, standby loss, daily water heating energy consumption, energy factor, and annual energy consumption for gas-fired storage water heaters.

#### **B354.1-04, 2nd edition**

*Portable Elevating Work Platforms* ..... \$60

This standard applies to portable, integral-chassis elevating work platforms with bases that cannot be driven or moved horizontally while the platform is in an elevated position. The platform can be moved, articulated, or adjusted by manual or powered means to position personnel, along with their necessary tools and materials, at work locations. For the purpose of this standard, a portable elevating work platform is termed an "aerial platform."

The purpose of this standard is to specify the minimum requirements for the design, manufacture, remanufacture, rebuild/recondition, testing, performance, inspection, training, maintenance, and safe operation of aerial platforms to achieve the following objectives:

- the prevention of personal injuries and accidents
- a uniformity in ratings
- an understanding by manufacturers, dealers, maintenance personnel, operators, owners, and users of their respective responsibilities.

#### **PLUS 1112, 2nd edition**

*Infection Prevention and Control in Office-Based Health Care and Allied Services* ..... \$45

This handbook has been developed to answer general questions common to all health care practices and personal services.

This handbook complements the CSA Z314 series of National Standards of Canada, which sets out requirements for medical device cleaning, decontamination, and sterilization in health care facilities. This publication is based on those requirements and is intended to help in their application to office-based facilities.

#### **Z248-04, 2nd edition**

*Code for Tower Cranes* ..... \$75

This standard applies to the design, characteristics, construction, installation, dismantling, operation, inspection, testing, and maintenance of tower cranes.

This standard applies to tower cranes powered by electric motors or internal combustion engines and any variations thereof that retain the same fundamental characteristics.

This standard is designed to:

- guard against and minimize injury to workers, and otherwise provide for the protection of life, limb, and property, by prescribing safety requirements
- provide direction to owners, employers, supervisors, crane erectors, operators, and others concerned with, or responsible for, applying this standard
- guide governments and other regulatory bodies in the development, promulgation, and enforcement of appropriate safety directives.

## New Standards – New Editions – Special Publications (cont'd)

### Z259.13-04, 1st edition

*Flexible Horizontal Lifeline Systems*..... \$60

This standard specifies requirements related to the performance, design, testing, and labelling of, and provision of instructions for, pre-engineered flexible horizontal lifeline systems (FHLSSs) for the attachment of personal protective equipment for protection against falls from a height. These systems are used for arresting falls and may be used for work positioning and travel restraint.

### Z259.16-04, 1st edition

*Design of Active Fall-Protection Systems*..... \$60

This standard is intended for professional engineers with expertise in designing fall-protection systems. It specifies requirements for the design and performance of complete active fall-protection systems, including travel-restraint and vertical and horizontal fall-arrest systems.

### CAN/CSA-Z262.7-04, 1st edition

*Guidelines for Spectator Safety in Indoor Arenas*..... \$35

These guidelines are intended to provide guidance for designing, constructing, and operating indoor arenas with respect to spectator safety.

These guidelines are intended to reduce the risk of injury to spectators and other non-participants resulting from objects leaving the playing surface during the normal course of an activity.

These guidelines are intended to be used by indoor arena owners and operators, architects, planners, engineers, construction companies, construction contractors, and appropriate inspectors involved in the design and construction of new indoor arenas.

### Z314.14-04, 2nd edition

*Selection and Use of Rigid Sterilization Containers*..... \$65

This standard defines essential elements in the selection, use, and maintenance of rigid sterilization containers. The selection criteria include minimum construction and performance requirements to help health care facilities choose products that are appropriate for their intended use.

This standard applies to the following types of rigid sterilization containers:

- protective organizing cases or trays that require additional wrapping or an additional method of containment for sterilization and maintenance of sterility
- rigid sterilization container systems that do not require additional wrapping
- trays intended for use in sterilization processes that do not rely on wrapping, such as emergency (flash) and point-of-use sterilization.

This standard provides requirements in the following areas:

- policies and procedures related to the use of rigid sterilization containers
- general characteristics, selection, and purchasing of rigid sterilization containers
- personnel training and occupational health and safety
- matching of containers to their appropriate sterilization methods and cycles
- testing before use

## New Standards – New Editions – Special Publications (cont'd)

### **Z314.14-04 (cont'd)**

- decontamination, preparation, and assembly of rigid sterilization containers
- sterilizer loading and unloading
- sterile storage
- on-site distribution and off-site transportation of rigid sterilization containers
- aseptic presentation and use
- quality assurance.

In addition, this standard addresses the preparation, handling, and loading of medical devices in containerized sets.

### **Z432-04, 2nd edition**

*Safeguarding of Machinery* ..... \$120

This standard applies to the protection of people from the hazards arising from the use of mobile or stationary machinery. It provides the criteria to be observed and the description, selection, and application of guards and safety devices. Where a current CSA standard exists for a specific type of machinery (e.g., CAN/CSA-B167, CAN/CSA-B354.2, CAN/CSA-M424.1, Z142, Z248, and CAN/CSA-Z434), it is to be used in conjunction with this standard to provide the most effective protection to the particular situation.

This standard does not apply to portable hand tools.

This standard is intended for those who design, build, modify, install, use, operate, or maintain machinery, machinery guarding, or safety devices. It is also intended to be used by those concerned with information, instruction, and training in safe working practices.

### **CAN/CSA-Z5359-04, 1st edition**

*Low-Pressure Hose Assemblies for Use With Medical Gases* (Adopted ISO 5359:2000, second edition, with Canadian deviations) ..... \$100

This standard specifies requirements for low-pressure hose assemblies intended for use with the following medical gases:

- oxygen
- nitrous oxide
- air for breathing
- helium
- carbon dioxide
- xenon
- specified mixtures of the gases listed above
- air for driving surgical tools
- nitrogen for driving surgical tools
- nitric oxide/nitrogen mixtures
- vacuum.

The standard is intended to ensure gas-specificity and to prevent cross-connection between systems conveying different gases. These hose assemblies are intended to be used at pressures less than 1 400 kPa.

## Nouvelles normes – Nouvelles éditions – Publications spéciales publiées en français

---

### B51-03, 16<sup>e</sup> édition

*Code sur les chaudières, les appareils et les tuyauteries sous pression* ..... 140 \$

Cette norme s'applique aux chaudières, aux appareils sous pression, aux tuyauteries sous pression et aux accessoires.

Cette norme compte trois parties :

La première partie énonce les exigences relatives aux chaudières, aux appareils sous pression, aux tuyauteries sous pression et aux accessoires. Elle vise deux objectifs principaux : premièrement, assurer la sécurité en ce qui a trait à la conception, la construction, l'installation, l'exploitation, l'inspection, la mise à l'essai et la réparation et deuxièmement, faire en sorte que les exigences adoptées par les autorités canadiennes soient uniformes.

La deuxième partie énonce des exigences visant les bouteilles à haute pression pour le stockage à bord des véhicules automobiles du gaz naturel utilisé comme carburant.

La troisième partie énonce des exigences visant les tuyauteries et les récipients de stockage souterrain sous pression des postes d'approvisionnement en GNC.

### B622-03, 3<sup>e</sup> édition

*Sélection et utilisation des citernes routières, des citernes routières à éléments multiples et des citernes amovibles pour le transport des marchandises dangereuses de la classe 2* ..... 60 \$

Cette norme énonce en détail les exigences relatives à la sélection et à l'utilisation, à la manutention, au remplissage et au déchargement des citernes routières, des citernes amovibles et des citernes routières à éléments multiples utilisées comme contenant pour le transport des marchandises dangereuses, classe 2.

Cette norme établit certaines exigences minimales pour la sélection des contenants appropriés pour le transport des marchandises dangereuses. Cette norme, toutefois, ne prescrit pas la sélection des matériaux de construction des contenants pour assurer la compatibilité chimique avec les marchandises dangereuses. Par conséquent, il est essentiel de faire preuve de compétence technique au moment de l'utilisation de cette norme.

S'il y a une différence quelconque entre cette norme et le Règlement sur le transport des marchandises dangereuses (TMD), le Règlement s'applique.

## Nouvelles normes – Nouvelles éditions – Publications spéciales (suite)

### CAN/CSA-Z262.7-04, 1<sup>re</sup> édition

*Lignes directrices visant la sécurité des spectateurs dans les stades intérieurs .....* 35 \$

Ces lignes directrices ont été élaborées afin d'aider à prendre en compte la sécurité des spectateurs au moment de la conception, de la construction et de l'exploitation des stades intérieurs.

Ces lignes directrices visent à réduire le risque de blessures, pour les spectateurs et les non-participants, causées par un objet projeté de la surface de jeu pendant le déroulement normal de l'activité.

Ces lignes directrices s'adressent aux propriétaires et aux exploitants de stades intérieurs, aux architectes, aux planificateurs, aux ingénieurs, aux compagnies de construction, aux entrepreneurs en construction et aux inspecteurs qui travaillent à la conception et à la construction de nouveaux stades intérieurs.

### Z314.10-03, 3<sup>e</sup> édition

*Sélection, utilisation, entretien et lavage des enveloppes, des blouses de chirurgien et des champs textiles réutilisables utilisés dans les établissements de santé.....* 70 \$

Cette norme définit les éléments essentiels de la sélection, de l'utilisation, de l'entretien, de la durabilité et du lavage des enveloppes, des blouses de chirurgien et des champs opératoires textiles réutilisables utilisés dans les établissements de santé.

Les critères de sélection comprennent les exigences minimales de fabrication et de tenue des textiles réutilisables pour aider les établissements de santé à choisir les produits ayant des propriétés barrières appropriées à l'usage prévu.

Cette norme énonce les exigences concernant les points suivants :

- a) les responsabilités de l'administration des établissements de santé ;
- b) les exigences physiques relatives aux aires de retraitement des textiles ;
- c) les exigences concernant le personnel, notamment les vêtements, l'équipement de protection individuelle, les qualifications et la formation pratique ;
- d) l'assurance de la qualité ;
- e) les caractéristiques de base, la classification et les critères de sélection pour les textiles réutilisables ;
- f) l'utilisation et les soins appropriés ;
- g) l'entretien et les réparations ;
- h) la manipulation, le transport et l'entreposage des textiles souillés et lavés;
- i) le lavage ;
- j) le suivi et la gestion des processus (mise à l'essai) ;
- k) le pliage et l'emballage des blouses de chirurgien, des champs opératoires et des paquets, notamment la sélection des matériaux d'emballage ; et
- l) la planification des mesures d'urgence (déversement de substances dangereuses).

### Z795-03, 2<sup>e</sup> édition

*Codage des données sur les accidents de travail et les maladies professionnelles* ..... 85 \$

Cette norme a pour but de proposer une méthode cohérente de consignation et de classification des renseignements sur les accidents de travail et les maladies professionnelles au Canada. Ces renseignements peuvent servir à faire des comparaisons, à cerner les tendances et à déterminer des questions à approfondir.

Cette norme

- a) propose une méthode de codage des données sur les accidents et les maladies liés au travail ;
- b) présente des lignes directrices sur la manière appropriée d'effectuer la collecte et le codage des données ;
- c) offre des conseils sur l'utilisation des statistiques, l'établissement de comparaisons et la reconnaissance de tendances.

Cette norme porte sur les renseignements relatifs aux accidents ou aux maladies. Elle ne traite aucunement des causes directes, indirectes ou contributives de l'accident ou de l'exposition ayant entraîné l'accident ou la maladie. Par conséquent, les renseignements recueillis selon cette norme ne peuvent servir à trouver les responsables d'un accident ou à en évaluer les causes.

### CAN/CSA-Z15882-04, 1<sup>re</sup> édition

*Stérilisation des produits de santé—Indicateurs chimiques—Guide pour la sélection, l'utilisation et l'interprétation des résultats* (norme ISO 15882-2003, première édition, adoptée sans modification) ..... 85 \$

Cette norme constitue un guide pour la sélection et l'utilisation des indicateurs chimiques utilisés dans le cadre de la définition des processus, de la validation, de la surveillance régulière et du contrôle des procédés de stérilisation. Elle traite également de l'interprétation des résultats ainsi obtenus.

## Formal Interpretations

---

The following interpretation regarding CSA standard **Z150-98, Safety Code for Mobile Cranes**, has been approved by the Technical Committee on Mobile Cranes.

**Question:** Do the requirements of Clause 4.4.5 (a) of CAN/CSA Standard Z150-98 apply to a crane that has been altered by the original manufacturer of the crane in accordance with an upgraded model series specification where the manufacturer has declared that the upgraded specification and the crane that it has upgraded comply with the requirements of the Z150 Standard?

**Answer:** No, the requirements of Clause 4.4.5 (a) of CAN/CSA Standard Z150-98 do not apply in this case.

## Under Development
